

DRAFT Revised WRAC Resolution, requesting that the Governing Board, direct SFWMD staff to:

1. Work in conjunction with FWFCC and USACE to develop a Kissimmee Upper Chain of Lakes Long Term Management Plan with lakes stage regulations based on adaptive protocols that consider long range weather forecasts and downstream conditions in Lake Okeechobee and the Estuaries, to provide windows of opportunity for lake drawdowns that optimize the beneficial uses of water and minimize adverse effects of drawdowns. ~~that establishes windows of opportunity for lake drawdowns based on adaptive protocols that are based on long term weather forecasts, the appropriate water levels; and consider the downstream impacts to Lake Okeechobee and the Estuaries;~~
2. Request that USACOE issue a long term permit that allows for the use of the Lake drawdown adaptive protocols as established in the Kissimmee Upper Chain of Lakes Long Term Management Plan; and
3. Request that legislative funding to the Florida Fish and Wildlife Conservation Commission for the purpose of Lake drawdowns be consistent with the adaptive protocols to be established in the Kissimmee Upper Chain of Lakes Long Term Management Plan.
